

How to install DGFT Signer

(A) Pre-requisites

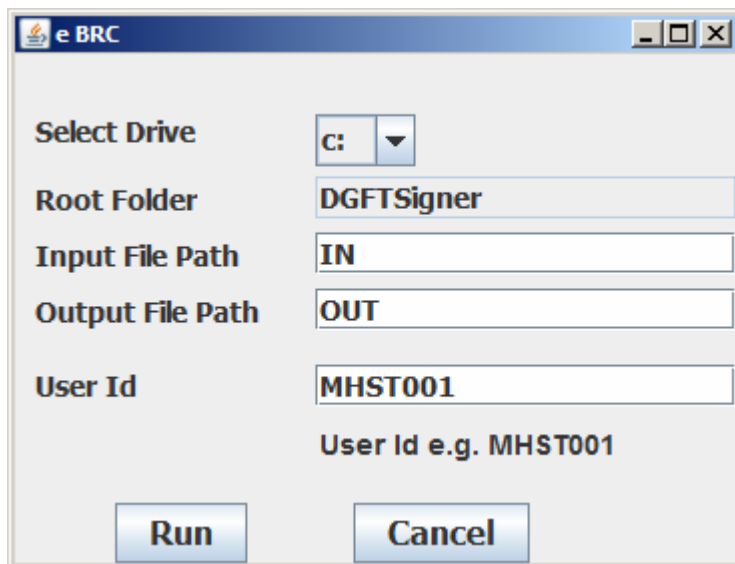

1. Make sure Winrar installed on the system ([click here to install Winrar](#)).
2. System should have Operating System WIN XP or higher.
3. To install the DGFT Signer user must have administrative privilege.

(B) Process to install DGFT Signer

Step-1: Download **DGFTSigner.rar** file into **C:** Drive.

Step-2: To extract the files right click on **DGFTSigner.rar** file then click on the option “**Extract Here**”. Step-3: After Extracting the Folder named “**DGFTSigner**” will be created automatically in the same drive.

Step-4: Open “**DGFTSigner**” folder and double click on the “**setupXmlSigner.bat**” file then specify the details as shown below.

The image shows a dialog box titled "e BRC" with a standard Windows window border. It contains several input fields and buttons. The fields are: "Select Drive" with a dropdown menu showing "C:"; "Root Folder" with a text box containing "DGFTSigner"; "Input File Path" with a text box containing "IN"; "Output File Path" with a text box containing "OUT"; and "User Id" with a text box containing "MHST001". Below the "User Id" field is a label "User Id e.g. MHST001". At the bottom of the dialog are two buttons: "Run" and "Cancel".

Step-5: Enter User Id and click “**Run**” button.

Please note:

Parameter Name	Parameter Type and Value	Description
Drive	Mandatory, C	Drive name depend on the Number o f Drives present on User system.
Root Folder	Mandatory	This is the root folder for DGFTSigner Signer Files.
Input File Path	Mandatory, [Value depend on the choice of User e.g. "IN"]	This folder will be used to store xml files to be signed.
Out File Path	Mandatory, [Value depend on the choice of User e.g. "OUT"]	This folder will be used to store Digitally signed xml files.
User Id	Mandatory	Enter User Id

Step-6: After clicking "**Run**" button, two folders (i.e. **IN**, **OUT**) and one file (i.e. **xml.cfg**) will be created automatically in same root folder "**DGFTSigner**".

Step-7: Always use

- A) Input file folder (e.g. IN) to store Input XML files to be digitally signed.
- B) Output file path (e.g. OUT) to store output digitally signed XML files.

Note: DGFT Signer Application need to be installed only once however, User has the liberty to install this application on multiple systems specifying the same User Id.
